TrainenGUI

```

- sliderrate : QSlider
- sliderbatch : QSlider
- sliderePOCHS : QSlider
- logOutput : QTextEdit
+ initGUI() : void
+ initSliderContainer() : QWidget
+ initNeuralNet() : QWidget
+ initOutput() : QGroupBox
+ makeSlider (min : int, max : int, interval : int, step : int, value : int) : QSlider
+ sliderChange(sliderNum : int) : void
+ buttonClicked: void
+ finished(result): void
+ goBack() : void

```

NNVisualisatie

```

- layers : int
- layerNodes : int
+ paintEvent (event : QPaintEvent) : void
- drawLinesInput (p : QPainter, diameter : int, nodes : int, spacing : int) : void
- drawLinesInner (p : QPainter, diameter : int, nodes : int, layer : int, spacing : int) : void
- drawLinesFromInnerNode (p : QPainter, diameter : int, nodes : int, beginX : int,
                           beginY : int, beginap : int, spacing : int) : void
- drawLinesToOutput (p : QPainter, diameter : int, nodes : int, spacing : int) : void
- drawInput (p : QPainter, diameter : int) : void
- drawLayer (p : QPainter, diameter : int, nodes : int, counter : int, spacing : int) : void
